OUR SIMPLE WAY OF HELPING YOU PICK WHAT'S RIGHT FOR YOU

PRO	Designed for use in Trade where the highest quality, built-to-last tool is desired for the best end result.
GEM	Designed for use as entry-level Trade or premium DIY where a quality tool is desired for a great end result.
ACE	Designed for use as short-life Trade or entry-level DIY where a value centric tool is desired to get the job done.

BUILT FOR PURPOSE

TEC	A built-for-purpose, solvent resistant, Industrial application tool. Tec tools vary on built-to-last or short-life depending on the job.
LITTLE GEM	Designed for and popular with the DIY market, especially within Hardware. This little brother to Gem boasts a similar performance makeup.

Rokset+

A 100 YEAR LEGACY AS AUSTRALIA'S BRUSH.

One of the only ever brush companies to historically manufacture brushes in Australia. Opening factory doors in 1923, Rokset went on to revolutionise the design and manufacture of brushes in Australia.

Over the years, Australia's Painting & Industrial sectors have worked with Rokset to design trade specific brushes and rollers making work easier and with better results. With these insights along with studying traditional handmade brush making techniques, Rokset brushes incorporate the best features into their brushes.

Rokset still lives up to its long and deep history of supplying the best brushes, rollers, and accessories to Australia. Just talk to any Australian painter and they'll know Rokset quality brushes.

sequence

your MATE in paint accessories

Starting with just one scraper, Sequence has been partnering with the Australian paint specialty sector for almost 50 years. This close partnership has been built through deep ongoing conversations with painters, paint shops, and the big paint manufacturers around what tools the industry needs. Throughout the years, the Sequence philosophy is to build the right tool, at the right price, for the right job.

Whether it's an economical, just-in-case tool for that occasional need or a premium, built-to-last tool to be used and abused and come back just as strong, Sequence listens to what painter's actually need.

BRING THE SPIRIT OF THE SAMURAI TO THE WORKPLACE

The inventor of the snap-blade knife and rotary cutter, as well as the perfector of the safety knife, OLFA holds true to their Japanese heritage in crafting only the highest quality blades.

As with the traditional samurai swordsmiths before them, OLFA knives adhere to the same principles - They are forged with the highest quality steel and materials, then finished with world class craftmanship.

Like the blades samurai used for centuries, OLFA knives are elegant in their simplicity, while underneath the surface have technical brilliance making them unparalleled in effectiveness; their superior sharpness means brute force is needless, but instead the blade does the work while the wielder purely instructs it.

LIGHTER

QUIETER

DUST FREE

Mirka is the world leader in surface finishing technology and offers a wide range of innovative quality sanding & dust extraction tools. Numerous awards support the fact that Mirka is just better – winner of the Professional Class at the World Tools Awards 2021, winner of the Global Media Awards 2019, Best of the Best Award from Reddot in 2018, and the IF Product Design Award 2014.

Each tool is crafted to feel like an "extension of the hand", and with investment in digital technology, myMirka combined with integrated vibration sensors and Bluetooth® low energy technology monitors and measures vibrations, tracking daily vibration exposure. And this is just the beginning.

BRUSHES, DECKING & HANDY PAINT PRODUCTS

WHAT MAKES UP A PAINT BRUSH?

FLAGGING

Mechanically created split ends on filament to imitate the natural characteristic of bristle. Flagging allows for a brush with standard filament to obtain higher Pick-Up & Release and a smoother finish.

SRT FILAMENT

This filament profile is solid, round, and tapered which gives it a superior stiff-soft balance while increasing Pick-Up & Release and giving a smoother finish.

BRUSH RESERVOIR

Through the use of spacer plugs, a void is created within the filament to hold more paint and release it at a steady pace. Depending on the size of the brush, either a single or double spacer plug gives the best result.

FERRULE MAKEUP

The material of the ferrule is determined by the expected use of the brush. Stainless steel will increase durability and eliminate rust, while tin would be ideal for a short life brush. In a quality brush like the Pinnacle, a double ferrule is used to further increase durability.

HANDLE FINISH

A varnished handle allows for easy cleaning, and ultimately a longer lifespan through lasting 'hand-feel', while a non-varnished handle will swell in the hand giving a fuller feel.

Rokset-Pro
Pinnacle

THE SUMMIT OF PAINT BRUSH TECHNOLOGY

ROKSET PRO PINNACLE BRUSH

These professional grade brushes are the pinnacle of quality with a high count, premium SRT filament blend, making them suitable for both oil and water-based paints. This blend finds the Goldilocks zone between stiff and soft, as well as maximising Pick-Up & Release and leaving an extremely smooth finish. The heavy duty stainless steel ferrule adds extra durability and rust resistance, while the varnished handle allows for easy cleaning and therefore extended life via a consistently good 'feel'.

- Premium filament blend for superior **Pick-Up & Release**, ultimate **smooth finish**, and optimal **stiff/soft balance**.
- Ideal for both **water-based** and **oil-based** paints, retaining wet stiffness and performance in both.
- **Extreme durability** strengthened with a 2-piece aluminium ferrule insert to assure **no lose filament**.
- Stainless steel ferrule **eliminates rust** while the varnished hardwood handle ensures **easy and thorough cleaning**.

ROKSET GEM PRECISION BRUSH

These high performance brushes consist of a premium SRT filament blend, making them suitable for both oil and water-based paints. This blend finds the Goldilocks zone between stiff and soft, as well as maximising Pick-Up & Release and leaving a very smooth finish. The heavy duty stainless steel ferrule adds extra durability and rust resistance. The handle is a non-varnished finish for those who prefer a fuller feel after the brush swells in the hand while working.

ROLLER COVERS, & ACCESSORIES

02

WHAT NAP IS DO YOU NEED?

NAP/PILE

SHORT — LONG

Best for fine finishes on smaller areas and oil-based paints & enamels

Best for larger surface areas which are semi-smooth or smooth like walls & ceilings

Best for getting into rough or bumpy surfaces

KNITTED OR WOVEN?

Knitted
Has more ability to pick-up & release. Best used with flat, matte, eggshell, or satin paints

Woven
Sheds less and give a smoother finish Can be used with enamels, primers, and all paint sheens - flat, matte, eggshell, satin, semi-gloss, and gloss

WHAT MATERIAL TYPE FOR WHAT JOB?

SMOOTH FINISH ON INSIDE SURFACE AREAS

Microfibre
An industry staple that balances good amounts of Pick-up & Release, Fine finish, and price. Microfibre is great when using all sheens of paint when a fine finish is desired on large areas like walls & ceilings, but not used outside with render. It can also we used a for its ability to produce a glossy finish.

SLIGHT STIPPLE EFFECT OR OUTSIDE/RENDER

Fabric/Polyester
Fabric and polyester are ideal for when a stipple effect is desired on all paint sheens, or when using render. With high Pick-Up & Release, they are an economical alternative to Lambskin but not as durable.
Economical

Lambskin
Lambskin is also ideal for when a stipple effect is desired on all paint sheens, or when using render. With very high Pick-Up & Release, it is also extremely durable and can also be used for different purposes as the fibres wear down. However, Lambskin is priced at a premium.
High durability

FINE / GLOSSY FINISH

Mohair
Mohair is perfect for when an extremely fine finish is desired when using semi-gloss and gloss paints. While it doesn't shed much, it does shed more than it's counterpart -foam.
Finer Finish

Foam
Foam is perfect for when a very fine finish is desired when using semi-gloss and gloss paints. Although mohair has the risk of a minimal amount of shed, foam's advantage is it will not shed at all.
No shedding

ROKSET PRO MICROFIBRE ROLLER COVER

Professional grade cover with perfect absorption and transfer of paint with minimal splatter or 'orange peel' effect. Superior Pick-Up & Release and an excellent finish.

ROKSET PRO
HOODED HEAVY DUTY ROLLER TRAY

These professional grade heavy duty trays have hooded backs to ensure less splash, as well as inbuilt steel legs which hook onto ladder rungs. Due to Rokset's unique manufacturing process, these trays allow dry paint to peel off much more easily.

ABOUT **MIRKA**®

Mirka Ltd is a family-owned Finnish company and a world leader in abrasives technology innovation. We offer a complete range of technically superior, high quality abrasives, innovatively designed tools, complete sanding systems and supplementary products. This total innovative solution delivers real benefits to customers in terms of speed, first-class efficiency, surface finish quality and cost effectiveness, even when tackling the most demanding applications.

Mirka is the first company in its sector to obtain the three most important quality standards. The production process guarantees reliable quality by following the ISO 9001 quality assurance system. The OHSAS 18001 occupational health and safety management system ensures a high level of work safety. The ISO 14001 environmental management system proves that we consider the environment in all our activities.

CORPORATE RESPONSIBILITY

CONTINUOUS IMPROVEMENT TOWARDS SUSTAINABILITY.

Changing conditions inspire us to improve and grow our business. We see that our customers are as interested in sustainability as we are. This is why our product development is focused on innovating the best sustainable products and systems, while continually improving our own environmental performance.

Our business is focused on providing the best surface finishing preparation tools and systems to customers. To be the most sustainable finishing systems provider, we are digging deep down to the core of our company to figure out what it really means to be sustainable. We have accomplished a great deal already and have many more initiatives we will take on in the future.

For people working at Mirka, it has always been clear to not waste financial or material resources – of our own or those of our customers. We find it is equally clear to preserve the planet's resources. Sustainability is a natural extension of this approach. It means taking the economy, the earth, and people into consideration when we make business decisions – now and for future generations.

We are continuously looking for opportunities to reduce our environmental footprint – this aligns with our company values and also cuts costs. We have worked hard to conserve energy and raw materials, reduce waste, increase recycling, and decrease the use of persistent chemicals. We are developing healthier, safer, and more efficient products and processes so that our customers and employees will benefit. For example, our dust-free sanding systems help protect the lungs of workers while giving a cleaner and better surface finish.

Clean Production — Clean Performance
Our Clean Commitments
Clean Partner — Clean Proactivity

MIRKA®
DEROS
DIRECT ELECTRIC RANDOM ORBITAL SANDER

youtu.be/dM8FddIPL4c

Mirka® DEROS is a random orbital sander developed for effective and dust-free sanding. The smallest and most ergonomic direct electric sander on the market has a brushless motor that maintains a constant speed even under heavy load. Vibration values are the lowest in its class and the symmetrical design ensures a comfortable grip, so you can sand for long periods without fatigue. With an easy to operate lever, you can adjust speed in an instant. The separate on/off switch ensures easy and safe handling. An integrated vibration sensor and Bluetooth low energy technology means you can keep track of vibration, speed and usage data via the myMirka app.

MIRKA®
DUST EXTRACTORS

Mirka Dust Extractors are of the highest quality and are tested to meet the requirements of each dust class according to IEC 60335-2-69 (worldwide) and by EN 60335-2-69 (European wide) standards.

DUST CLASS L
Low Risk

For professional users who only vacuum low risk dust such as household dust, soil or sand, sanding dust from soft wood or solid surfaces (such as Corian). The occupational exposure limit for this kind of dust is > 1 mg/m3. The dust extractor must be able to retain 99% of the dust.

DUST CLASS M
Medium Risk

For professional users within collision repair, construction, and woodworking that sand for instance hard wood, plaster, putty, latex and oil paints, etc. that cause medium risk dust. The occupational exposure limit (OEL) for this kind of dust is > 0.1 mg/m3. This means that the dust extractor must be able to retain 99.9% of the dust. Air flow must also be minimum Vmin = 20 m/s in the suction hose.

MIRKA®
CORDLESS SANDERS
& POLISHERS

Mirka cordless tools are light, ergonomic and optimised for spot repair and finessing. Ideal for professionals who appreciate the convenience of cordless. Incredibly nimble, they are quiet, small and need very low maintenance thanks to the brushless motor. Cordless tools are delivered with two 2.5 Ah 10.8V Li-ion batteries and a charger.

With variable speed on the trigger you get easy control of the process by touch. Mirka's cordless tools are top of the range models with Bluetooth connectivity, which means additional options for digitally controlling the process via the myMirka® app. The latest features are RPM range management and auto-stop function (in-app purchases). It's never been easier to standardise your spot repair or finessing process.

MIRKA SANDING BLOCK KIT

A multipurpose tool conceived for sanding on concave, convex and flat shaped surfaces thanks to special plates attached to a hand block body. The replacement of the different plates is quick and easy. This kit contains a hand block body 70 x 198 mm, a hose adapter Ø 20/28 mm outer diameter and 4 changeable plates (Convex with R = 160 mm, Concave with R = 52 mm, Concave with R = 100 mm and Flat). Mirka® Hand Sanding Blocks are specially designed for sanding by hand in combination with Mirka's revolutionary net-sanding products, although they can also be used with other grip abrasives. To ensure dust-free sanding the hand sanding block simply needs to be connected by hose to a dust extraction system.

Product Code	8391520111
Size	70x198mm
Attachments	4
Duct System	Central Vacuum Ready
Barcode	6 416868 908756

MIRKA ROUNDY KIT

The Mirka Roundy is ergonomically designed to fit into the palm and is suitable for multiple operations from paint stripping to lacquer & paint sanding. The Roundy features 34 dust extraction holes making it a versatile and practical hand block that accepts both Abranet® abrasives and 15-hole 150mm discs, which wrap around its sides to help with corners and other hard to reach areas. The Roundy kit includes the ergonomic hand block + hose + 15 Abranet strips (5 x P120, 5 x P180, 5 x P240).

Product Code	KIT00ROUND
Size	150mm
Attachments	15
Duct System	Central Vacuum Ready

MIRKA®
MANUAL SOLUTIONS

+ + + = **NO DUST!**

+ + + = **NO DUST!**

MIRKA® ABRANET

Developed for sanding putty, primers, lacquers, composite materials and a wide range of other materials for industrial use. Abranet combines high performance and a long lifespan, making it a cost-effective solution. Designed for dry sanding, by hand or with a machine, the true dust-free sanding characteristics result in a cleaner work environment, as well as a better surface finish.

MIRKA® ABRANET ACE

Developed to achieve outstanding results on challenging surface conditioning and repair applications. Thanks to the optimised net construction and ceramic grains, Abranet Ace offers superior cut and performance for hardwoods (such as beech and oak) and fast cutting on various solid surface materials as well as for cleaning of different industrial rollers. Abranet Ace also works excellent on primer sanding applications.

MIRKA® ABRANET ACE HD

For dust-free sanding Abranet Ace HD is durable and tough with ceramic grains. The strong net structure resists high wear and tear which makes Abranet Ace HD ideal for heavy-duty applications. The improved woven mesh backing increases the lifetime of the abrasive, and makes the sanding process faster.

MIRKA® IRIDIUM

A premium paper abrasive for universal sanding Iridium is perfected for speed and efficiency, having a mix of ceramic and aluminium oxide grains on a flexible paper with precision coating that prevents clogging and reduces pilling. It practically repels dust and lifetime is increased as the grains stay sharp for longer. Dust extraction is optimised with multi-hole patterns for discs. Iridium delivers amazing results on both soft and hard surfaces, making it the ideal paper abrasive choice for professionals in any industry.

MIRKA® GALAXY

The ceramic grains of the Galaxy are engineered not to dull, as once the edge of the abrasive grain breaks off it simply forms new edges, making it possible for the Galaxy to continue cutting – from edge to edge. The self-sharpening ceramic grains allow for a winning combination of long life, fast cut and easy polishability. Thanks to the optimized Multifit hole configuration, the abrasive is always correctly placed on any machine without the need to specifically align it. At its core, the Mirka Galaxy is a multi purpose product, suitable for the sanding of both soft and hard materials as well as various substrates. Superb edge wear resistance, excellent clogging resistance, dust repellent coating, and optimal dust extraction.

MIRKA® ABRALON

A unique, multifunctional sanding material developed for tackling both smooth and profiled surfaces. The patented, flexible construction allows it to create a smooth sanding pattern on angled surfaces and edges while minimising the risk of pressure marks. The flexible weave allows water and air to pass freely, resulting in a cleaner sanding process and a long lasting abrasive. Recommended for fine sanding of profiled surfaces and for finishing prior to polishing. Recommended to use wet.

MIRKA® GOLDFLEX SOFT

Soft and flexible, Goldflex Soft has been developed for sanding profiled surfaces and irregular, difficult-to-reach details by hand. The foam base is grip friendly and applies pressure evenly, which reduces the risk of sanding through the surface. The special stearate coating prevents clogging. Suitable for both dry and wet sanding.

MIRKA® POLISHING PADS

## MIRKA YELLOW WAFFLE POLISHING FOAM PAD

A polishing pad with medium density hardness and waffle shape. The durable reticulated foam has an excellent elasticity. The waffle shape has an optimised pattern which improves the cutting performance and reduces the surface temperature during the polishing process. The pad is designed to be used in combination with Polarshine Polishing Compounds.

Product Code	Ctn Qty	Size	Colour	Pack Size	Barcode
7993408521	10	85 x 25mm	Yellow Waffle	2	6 416868 915495
7993415021	10	150 x 25mm	Yellow Waffle	2	6 416868 915532

MIRKA BLACK WAFFLE POLISHING FOAM PAD

A reticulated waffle shape structured foam pad for hologram removal gives an excellent finishing on both fresh and fully cured paint works. The good balance between elasticity and density in the foam contributes to the final result. The pad is designed to be used in combination with Polarshine 5 polishing compound.

Mirka Power Tool Warranty

Mirka power tools have a two-year warranty starting from the date of purchase and covering defects in material and workmanship. By registering your Mirka power tool within 30 days from purchase you will obtain an additional one-year warranty.*

ABRASIVES

04

The electrostatically coated manufacturing process
results in more even distribution of grit resulting in
more even cut and better resistance to clogging.

Quality backing paper results in sand paper being
more flexible and resistant to cracking.

AGGRESSIVE CUT

LONG LIFE

ANTI-CRACK TECHNOLOGY

*Sand paper range

ALL SEQUENCE SANDPAPER IS MANUFACTURED BY KLINGSPOR

MADE IN EUROPE TO THE HIGHEST WORLD STANDARDS.

Anti-Crack technology means
easier sanding, while getting
more out of each sheet with
much less frustration.

WE WANT TO HELP OUR RETAIL PARTNERS SHOW OUR ABRASIVES IN THE BEST LIGHT.

REACH OUT AND LET'S TALK ABOUT GETTING OUR KLINGSPOR SANDPAPER SHEET STAND INTO YOUR SHOP!

CAULKS, FILLERS, & RELATED TOOLS

05

CAULKING TIPS

01 Use painter's tape to control caulk lines. Apply caulk, smooth the joint with your fingers, and remove the tape for perfect lines.

02 Push, don't pull your caulk. This will allow caulk to be forced into gaps, however if the surfaces are flush pushing too hard will make the tip skate all over making a mess.

03 If you have a wet tube of caulk, fret not. Prevent them splitting under pressure by wrapping duct tape around the tube first.

04 Easily disguise your caulk in concrete by sprinkling cement mix on top when still wet. When it dries, brush off the excess and the caulk will virtually disappear.

05 Get into the tightest and sharpest angles. By using a standard drinking straw on the end of the nozzle, hard to reach places are no more. Just be weary, this method is hard to control.

06 Avoid unsightly globs. If stopping on a long line, start from the other end and meet where you stopped. Try to also keep this point out of eye line.

07 Use your body and legs to move the gun. This will help your wrists from cramping as well as make keeping a consistent speed and angle easier.

FILM, PAPER, DROP SHEETS, & TAPES

07

BEFORE PUTTING DOWN YOUR DROP SHEET, VACUUM THE AREA TO AVOID SCRATCHING SURFACES AND CREATING EXCESS WEAR AND TEAR ON YOUR DROP SHEET.

PACK YOUR DROP SHEETS UP AFTER A HARD DAYS WORK, BUT IF LEAVING THEM DOWN FOR EXTENDED PERIODS MAKE SURE TO HAVE ANOTHER IMPERVIOUS LAYER UNDERNEATH.

BE CAREFUL, WHEN IN USE DROP SHEETS CAN BECOME SCRUNCHED UP CREATING TRIPPING HAZARDS AS WELL AS BECOME SLIPPERY WITH SPILLS.

TAPE OR TACK DOWN YOUR DROP SHEET, THIS WILL HELP KEEP IT IN PLACE WHERE IT CAN BEST DO ITS JOB OF PROTECTING YOUR SURFACES.

SEQUENCE PRO PRE-TAPED MASKING FILM

This professional grade, high quality LDPE masking film can be used both inside and outside, is static free, and unfolds outwards for easy application. The reusable dispenser means always being more economical with refills.

SEQUENCE ACE PRE-TAPED MASKING FILM

This quality pre-taped film is corona treated, increasing surface energy on each side meaning it will cling better to surfaces reducing the risk of paint getting behind. On the outer side it absorbs more paint reducing risk of dripping. Its outer fold makes application simple and tussle free, while using green washi tape to allow for up to 60 day removal without too tight a stick.

PERSONAL PROTECTION EQUIPMENT

08

PPE IS THE LAST LINE OF DEFENCE, NOT THE FIRST.

Safety is of the highest importance in every workplace. Make sure to create a safe workplace first then use PPE to add additional protection.

STEP 01
Eliminate the hazards

STEP 02
Substitute the hazards with something safer.
Isolate the hazards from people.
Reduce the risks through engineering controls.

STEP 03
Reduce exposure to the hazards using administrative actions.
Use personal protective equipment.

WORKWEAR

DO YOU KNOW WHY PAINTERS WEAR WHITE?

Although there are many theories, the general consensus is painters began wearing white because most materials they work with are white - caulks, fillers, plaster, and of course paint. This combined with white being considered a `uniform' for many European labour unions of the 19th century means if you walk into a room being professionally painted today, chances are you'll still see a painter almost from head to toe in pure white.
