Decorators Brush Range

**THE SUMMIT OF PAINT
BRUSH TECHNOLOGY**

An Absolute Home Run for Paint Spot Moorabbin

Two years ago Paint Spot jumped on the Rokset Pinnacle (then Sequence Pinnacle) and started kicking goals right away. Stuart at the Moorabbin store swears by them, saying they're the go-to brush for the entire staff as their performance is up there with the high end brushes but at a much better price point. "I even use them at home" Stuart boasted.

The way we sell them to trade painters is letting them know that their performance is amazing, they keep their shape much better than others, are really reliable, extremely easy to work with, and so easy to clean out. Stuart even going as far to say, "I can't remember ever getting any complaints". The varnished handle means Pinnacles are great for painters who value their brush being easier to clean and therefore keeping its 'feel' and lasting longer. The wider ferrule is also really helpful for a trade painter who needs to hold a greater amount in their brush.

At the Moorabbin Paint Spot store they not only serve trade painters but retail and DIY too. This is where the Pinnacle can help with sales and ease of selection. Not only does it perform up to the high standard of trade, but it will help someone who doesn't have the knowledge or skills of a trade painter actually paint better. This makes it not only the brush the staff recommend for trade painters who are looking for a change, but all their DIY customers.

The varnished handle looks great on the wall and really adds to the visual appeal of the whole category, and because the painters who try them love them and buy in bulk they've actually grown the whole category. They're a rebuy target and one that sells in bulk a lot of the time meaning trade painters can't get enough, "Even when painters get their paint somewhere else, they'll still come to us to buy their brushes", Stuart laughs.

Finally, a benefit for Paint Spot Moorabbin in ranging the Rokset Pinnacle range is being able to look outside store brands and deal with SequenceRokset Consolidated. "The Pinnacles perform amazingly and come at a fantastic price point, but on top of that, SRC being an independent supplier just seems to do a better job. That's why as a store and staff we love them".

WHAT PAINTER'S THINK OF THE PINNACLE

When painters use the Pinnacle, they love it. We stay on the pulse of the Painting & Decorating market and anonymously asked painters what they thought of the Pinnacle so we could get unfiltered, true insights.

What we found was of the painters who had used a Pinnacle, they were blown away by the superior value, and even considered them better than the leading premium brushes.

In some cases, painters who had used them before moving to a different location actively searched out them out, asking their local paint store if they could get them in.

"...better than the Monarchs and the bristles (sic) are a little softer"

- Graeme

"...Pinnacles out at the moment are unreal"

- Aaron

"Love the oval cutter..."

- Matthew

WHAT MAKES UP EVERY PINNACLE BRUSH

Each Pinnacle brush is made with the love and care that has been synonymous with Rokset brushes since they first walked off the South Australian production line in 1923.

Rokset know everything about brushes and what makes up the right brush so painters can just paint.

But just in case they want to know or you do, we're open like a book; because what we know best of all is... no one can build brushes quite like us.

* Find Rokset Pro Pinnacle datasheets at the back of this booklet

100% Solid Round Tapered (SRT) filament gives superior pick-up & release through the extra paint space from the filament's tapering, while dramatically improving smoothness & finish

Spacer plugs gives each brush a generous and durable reservoir increasing pickup and brush lifespan

The stainless Steel ferrule is held strongly by 2-3 rivets, creating a rust-free brush with superior durability

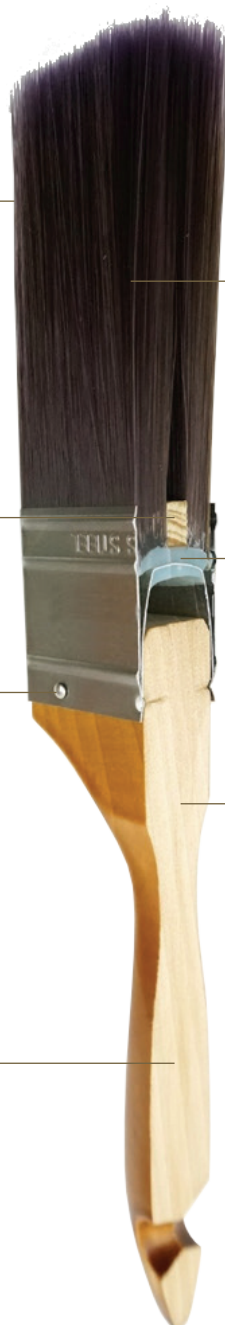

Each varnished hardwood handle results in an excellent hand feel, while being super durable and retaining its shape through use and consistent contact with moisture

Blended PBT (65%) & PET (35%) premium filament finds the goldilocks zone of stiffness and softness, while also retaining amazing wet stiffness during performance.

The aluminum ferrule insert increases the durability of the two-phase epoxy, creating an environment which will not drop filament

Each job specific brush has the ideally suited handle for the required job

- Wall brush: 'Flat Beaver Tail' handle design for a strong comfortable palm grip when making long stokes
- Oval Brush: 'Long' handle design to hold like a pencil for maximum control when precise painting
- Sash Cutter: 'Square' handle design to comfortable fit thumb & index finger for best control when cutting in
- 'Rat Tail' Handle design to hold like a builders pencil ideal for when painting window & door frames

ROKSET PRO PINNACLE WALL BRUSH

| Product Code | Size | Ferrule Thickness | Spacer Plugs | Full Filament Length | Combined Filament Weight |
|--------------|------|-------------------|--------------|----------------------|--------------------------|
| 22946 | 38mm | 16.8mm | 2 | 78mm | 35.2g |
| 22953 | 50mm | 19.9mm | 2 | 85mm | 56.1g |
| 22960 | 63mm | 20.0mm | 1 | 89mm | 88.0g |
| 22977 | 75mm | 22.2mm | 2 | 92mm | 107.8g |
| 22984 | 88mm | 22.8mm | 2 | 100mm | 136.4g |

PRODUCT CONSTRUCTION

- 65% SRT PBT 0.18mm filament, 35% SRT PET 0.18mm filament
 - Solid Round Tapered filament gives superior pick-up & release, while dramatically improving smoothness & finish.
 - Premium PBT filament is soft yet has excellent stiffness, high abrasion resistance, and bend recovery, while also retaining wet stiffness in latex & water based paints.
 - PET filament increases the stiffness of the brush, while also retaining wet stiffness in latex & water-based paints.
 - Both filaments are round and smooth in shape.
 - This mixture of filaments is chosen due to it being the optimal combination of rigid & soft.
 - Both filaments are solvent resistant.
- Epoxy bonded filament for strong attachment with no loose filament.
- Stainless steel, riveted ferrule for anti-rust properties & added durability.
- 2-piece ferrule with aluminium insert resulting in superior epoxy durability dramatically increasing lifespan.
- Varnished hardwood handle results in high durability and an excellent hand feel, while being resistant to swelling & bowing.
- 'Flat Beaver Tail Handle' design is shaped to fit perfectly into the palm of the hand, ideal for long flat strokes.

DESIGNED FOR

The handle type, longer filament, and convex shape of the bristles make these brushes ideal for painting large surface areas like open walls. This brush is designed for professional painters who have greater demands from their brushes and are built-to-last with proper care. The high filament count gives this brush exceptional pick-up & release ability and gives a superior finish.

USAGE AND STORAGE CONDITIONS

These brushes are ideal for uses with most paints. Brushes should be cleaned thoroughly after every use to prolong life.

ROKSET PRO PINNACLE OVAL CUTTER BRUSH

| Product Code | Size | Ferrule Thickness | Spacer Plugs | Full Filament Length | Combined Filament Weight |
|--------------|------|-------------------|--------------|----------------------|--------------------------|
| 30651 | 25mm | 11.5mm | 1 | 59mm | 11.0g |
| 30668 | 38mm | 14.3mm | 1 | 70mm | 24.2g |
| 30675 | 50mm | 15.3mm | 1 | 78mm | 41.8g |
| 30682 | 63mm | 17.8mm | 1 | 85mm | 55.0g |
| 30699 | 75mm | 19.3mm | 1 | 89mm | 80.7g |

PRODUCT CONSTRUCTION

- 65% SRT PBT 0.18mm filament, 35% SRT PET 0.18mm filament
 - Solid Round Tapered filament gives superior pick-up & release, while dramatically improving smoothness & finish.
 - Premium PBT filament is soft yet has excellent stiffness, high abrasion resistance, and bend recovery, while also retaining wet stiffness in latex & water based paints.
 - PET filament increases the stiffness of the brush, while also retaining wet stiffness in latex & water-based paints.
 - Both filaments are round and smooth in shape.
 - This mixture of filaments is chosen due to it being the optimal combination of rigid & soft.
 - Both filaments are solvent resistant.
- Epoxy bonded filament for strong attachment with no loose filament.
- Stainless steel, riveted ferrule for anti-rust properties & added durability.
- 2-piece ferrule with aluminium insert resulting in superior epoxy durability dramatically increasing lifespan.
- Varnished hardwood handle results in high durability and an excellent hand feel, while being resistant to swelling & bowing.
- 'Long Handle' design is shaped to hold like a pencil allowing rolling it for maximum control, ideal for precision painting.

DESIGNED FOR

The handle type of this brush gives the painter greater control while the oval shape of the ferrule results in concentration of filament around the middle. This type of design delivers thinner paints and varnishes better while giving maximum control and is ideal for door frames, door jams, window sashes, etc. This brush is designed for professional painters who have greater demands from their brushes and are built-to-last with proper care. The high filament count gives this brush exceptional pick-up & release ability and a superior finish.

USAGE AND STORAGE CONDITIONS

These brushes are ideal for uses with most paints. Brushes should be cleaned thoroughly after every use to prolong life.

ROKSET PRO PINNACLE SASH CUTTER BRUSH

| Product Code | Size | Ferrule Thickness | Spacer Plugs | Full Filament Length | Combined Filament Weight |
|--------------|------|-------------------|--------------|----------------------|--------------------------|
| 22991 | 38mm | 14.4mm | 2 | 70mm | 24.2g |
| 23011 | 50mm | 15.2mm | 1 | 80mm | 46.2g |
| 23028 | 63mm | 16.6mm | 1 | 85mm | 63.8g |
| 23035 | 75mm | 17.3mm | 2 | 92mm | 82.5g |

PRODUCT CONSTRUCTION

- 65% SRT PBT 0.18mm filament, 35% SRT PET 0.18mm filament
 - Solid Round Tapered filament gives superior pick-up & release, while dramatically improving smoothness & finish.
 - Premium PBT filament is soft yet has excellent stiffness, high abrasion resistance, and bend recovery, while also retaining wet stiffness in latex & water based paints.
 - PET filament increases the stiffness of the brush, while also retaining wet stiffness in latex & water-based paints.
 - Both filaments are round and smooth in shape.
 - This mixture of filaments is chosen due to it being the optimal combination of rigid & soft.
 - Both filaments are solvent resistant.
- Epoxy bonded filament for strong attachment with no loose filament.
- Stainless steel, riveted ferrule for anti-rust properties & added durability.
- 2-piece ferrule with aluminium insert resulting in superior epoxy durability dramatically increasing lifespan.
- Varnished hardwood handle results in high durability and an excellent hand feel, while being resistant to swelling & bowing.
- 'Square Handle' design is shaped so the thumb and index finger fit comfortably for excellent control when cutting in.

DESIGNED FOR

The handle type of this brush, as well as the thinner ferrule with a lower filament count, gives the painter greater control and is therefore ideal for cutting in. This brush is designed for professional painters who have greater demands from their brushes and are built-to-last with proper care. The high filament count gives this brush exceptional pick-up & release ability and give a superior finish.

USAGE AND STORAGE CONDITIONS

These brushes are ideal for uses with most paints. Brushes should be cleaned thoroughly after every use to prolong life.

ROKSET PRO PINNACLE ANGLED SASH CUTTER BRUSH

| Product Code | Size | Ferrule Thickness | Spacer Plugs | Full Filament Length | Combined Filament Weight |
|--------------|------|-------------------|--------------|----------------------|--------------------------|
| 30705 | 25mm | 10.0mm | 1 | 59mm | 13.2g |
| 23042 | 38mm | 10.2mm | 1 | 64mm | 19.8g |
| 23059 | 50mm | 11.6mm | 1 | 72mm | 29.7g |
| 23066 | 63mm | 14.5mm | 1 | 78mm | 60.5g |

PRODUCT CONSTRUCTION

- 65% SRT PBT 0.18mm filament, 35% SRT PET 0.18mm filament
 - Solid Round Tapered filament gives superior pick-up & release, while dramatically improving smoothness & finish.
 - Premium PBT filament is soft yet has excellent stiffness, high abrasion resistance, and bend recovery, while also retaining wet stiffness in latex & water based paints.
 - PET filament increases the stiffness of the brush, while also retaining wet stiffness in latex & water-based paints.
 - Both filaments are round and smooth in shape.
 - This mixture of filaments is chosen due to it being the optimal combination of rigid & soft.
 - Both filaments are solvent resistant.
- Epoxy bonded filament for strong attachment with no loose filament.
- Stainless steel, riveted ferrule for anti-rust properties & added durability.
- 2-piece ferrule with aluminium insert resulting in superior epoxy durability dramatically increasing lifespan.
- Varnished hardwood handle results in high durability and an excellent hand feel, while being resistant to swelling & bowing.
- 'Rat Tail Handle' design is shaped to hold like a pencil for excellent control, ideal for painting window and door frames.

DESIGNED FOR

The handle type of this brush, as well as the thinner ferrule with a lower filament count, gives the painter greater control. This and the angled profile of the filament make this brush ideal for cutting in sharper angled spaces. This brush is designed for professional painters who have greater demands from their brushes and are built-to-last with proper care. The high filament count gives this brush exceptional pick-up & release ability and a superior finish.

USAGE AND STORAGE CONDITIONS

These brushes are ideal for uses with most paints. Brushes should be cleaned thoroughly after every use to prolong life.
